5V 0.48A
12V 0.56A

Product of Thailand
CAUTION: Product warranty is void if any seal or label is removed, or if the drive experiences shock in excess of 300 Gs.

This drive is manufactured by Seagate for OEM distribution. For product information or technical support, please contact your system OEM.

Installation Summary

For more installation information, visit Seagate's website at www.seagate.com/support, or contact your local distributor.

1. Turn the computer Case Select if using an drive in a case, and a partition drive into the correct mode (IDE or SATA). For more information, see the drive's manual and the other side of this label.
2. Mount the drive using the appropriate screws.
3. Do not over-tighten the screws.
4. Install the power and data cables.
5. Run your computer's BIOS setup program.
6. Enter the Auto-Detect option and enable Logical Drive Assigning (LDA). Save and exit the setup program.

Prepare the drive for use with your Operating System. See your OS instructions for details. Be careful to protect the sensitive, non-replaceable drive data before making changes. Windows XP or Vista provides the OS or BIOS installation. Windows XP or Vista uses SATA and Parallel controllers. Microsoft uses Drive Setup in the OS disk to do so.
